5-gallon Compost Tea Brewing System

Model: KIS-5gal
5-gallon Compost Tea Brewing System

Manufacturer: KIS Organics

5-gallon Compost Tea Brewing System

The 5-gallon system was designed for the home gardener or grower. It was developed to provide an organic solution for caring for our plants and soil, to help eliminate the reliance on harmful pesticides, and minimize the use of chemical fertilizers. It works by inoculating the plants and soil with the necessary microbes, that are often lacking in an urban setting, that the plant needs to ward off diseases and be healthier. Compost tea provides a safe, natural, and totally organic environment for your plants and soil!

The Compost Tea Brewing System comes with:

5-gallon bucket lid
High-velocity Aerator

Power Consumption = 110 volts single phase
Power Output (at maximum output) = 106.11W

Durable Plastic Tubing with Circular Coil Technology
3 Compost Tea Food Packs in 400 micron mesh bags. (enough foods and compost for 3 complete brews)
2 Soil Food Web coupons for discounts on testing your own composts and compost tea.

Note: 5-gallon bucket (724380) is not included to save on shipping costs.

Why the KIS 5-gallon Brewing System?

The only 12-hour Soil Food Web approved brewer in the world!

Benefits of Compost Tea

Compost tea has been shown to help in disease-suppression
Helps extend root systems
Increases water and nutrient retention
Is 100% safe and natural
Creates healthier plants
Helps breakdown of toxins in the soil and on the plants
Enhances the taste of fruits and vegetables
Creates a safer place for people and animals by using an organic product, reducing the need for chemical pesticides, herbicides, and fertilizers
Occupies the space around the infection sites so disease-causing organisms cannot penetrate into the tissues of the plant
Cannot over-apply because it is completely natural and organic
Portability-You can spray at a rate of approximately 5 gallons per acre, depending on the biological numbers of
