EASY2GROW AUTOPOTS - 2 POT SYSTEM WITH RESERVOIR

Model: 707610

EASY2GROW AUTOPOTS - 2 POT SYSTEM WITH RESERVOIR

Manufacturer: AutoPot

Easy2Grow Autopots

2 POT EASY2GRO KIT

The auto pot single is a gravity-fed self-watering planter. Since the system is gravity feed, you have no need for a pump. The auto pot single is a 1.93 gallon square pot that is meant to be filled with a 50/50 soilless mix of choice. By connecting the 1/4" feeder tube to a reservoir (of your size choice) placed at a higher elevation than the auto pot, the auto pot will automatically water the plant as needed allowing "dry" periods so that the plants are not overwatered, reducing the risk of obtaining root rot and other disease and pest infestations common with overwatering. Auto pots are good for use both indoor and outdoor as well as growing ornamentals or edible plants. The Auto pot dual is the same as the auto pot single except it is a two plant system. Both square containers are 1.93 gallon that fit into a dual cavity tray providing automatic watering through the same gravity feed concept.The Easy2Grow kit is the same as the auto pot 2 or Easy2Grow dual PLUS a 12.4 gallon reservoir with a cover. All of the components included in the easy grow kit can be stored inside of the reservoir during off season times.

Manufacturer's Product Information

2007 MSRP Each $82.95
Case Weight10.00 LB
Case Dimensions11.75 x 15.25 x 24.75 IN
Case Quantity1
