FILTRA M 1000 ZEOLITH 1 LT 1/CS SO

Model: 731470

FILTRA M 1000 ZEOLITH 1 LT 1/CS SO

Manufacturer: ELOS

Filtra M
NEW FORMULA: Now with the highest content of clinoptilotite!
Excessive population of fish, construction or temporary imbalance in the aquarium can result in an excessive presence of minerals or organic matter (NO3 and PO4) that may be harmful for invertebrates. These nutrients can lead to the formation of unwanted algae, or at least to an excessive presence of organic substances and minerals.
Elos Filtra M is an innovative and versatile filtering material of natural origin, characterized by a structure with open channels, is studied for the removal of organic parts and minerals (molecular sieve) and as a substrate for bacterial colonies (biological filtration) in the 'Natural Marine Aquarium'.
Elos Filtra M is part of the product line management of the aquarium by the method is used Purist fact, in combination with ELOS RB10 and RB20, as substrate biotic.
Place in the filter and pre-activated with Elos RB10 and RB20, slowly change its absorbent and contributing to the formation of a progressive and excellent bacterial flora, followed by facilitating remineralization of the aquarium that will have beneficial effects in terms of biological balance.
Highlights:

- Assisting in the fight against unwanted algae
- Unbeatable for the removal of nitrogen compounds and destruction of nitrate
- Excellent media for microbial colonies.

Price: $20.99
