Current Culture Under Current 8

Model: 743010
Current Culture Under Current 8

Manufacturer: -

Current Culture H2O - Under Current 8
The Under Current is the worlds first re-circulating Water Culture Hydroponic System featuring our Patent Pending Sub-Current Culture™ Method. This innovative application circulates literally hundreds of gallons of solution per hour beneath plant roots.

The Under Current™ supercharges the solution with dissolved oxygen, creating a hyper aerobic condition. Constant, 24/7 nutrient circulation ensures that pH and EC are uniform throughout the entire system. An inline Danner Mag-Drive pump provides peripheral negative pressure by thrusting nutrients back to a return module (Epicenter). From this point the solution is drawn from module to subsequent module, evoking perpetual fluid motion.

The Under Current Includes:

8 gallon growth modules
2" manifold
2” Uni Seals
CCH2O 8" custom molded Lids with port hole
CCH2O 8" custom molded Net Pots
Danner Mag-Drive™ Return Pump
Air Force Pro™ Air Pump
9” Air Diffuser Disc
Medium Round Air Stones
Air Distribution Manifold
Air Hose
In-Line Filter
Adjustable Float Valve with Reservoir Adapter Kit
Drain Valve
Chiller Adapter
Garden Hose Drain Adapter
1-Year Manufacturer's Warranty

Under Current 8 Specifications:

Size: 32" x 96"
Full System Volume: 65 Gallons
Power Usage: 145 Watts
Air Pump(s): Air Force Pro AFP-60
Water Pump(s): Danner MAG500
Recirculation Turnover Rate: 7.6 times/hr
