Dip 'n Grow 16 oz

Manufacturer: Dip 'N Grow

Dip 'N Grow Dip 'n Grow 16 oz (DG01601)Dip 'n Grow is one of the most effective rooting hormones available. Propagators at nurseries and universities nationwide have increased their yields with this seed-starting product and found Dip 'n Grow to be more economical and easier to use than other rooting agents.
Dip 'n Grow features a liquid concentrate easily diluted with water to the necessary strength. The tested, proven formula contains two root-inducing auxins (IBA and NAA). Alcohol is used as the solvent for the active ingredients, so Dip 'n Grow is self-sanitizing and cross-contamination problems are eliminated.
Save time, money, and disposal of plastics when you choose Dip 'n Grow -- all desired concentrations are obtained from one bottle. As a liquid concentrate, it allows rooting hormones to be absorbed into the cutting stem more evenly and easily, increasing rooting success over the other powders on the market.
