LUMATEK™ LK7240 ELECTRONIC BALLAST 750W 240V - DIMMABLE

Model: 902550
LUMATEK™ LK7240 ELECTRONIC BALLAST 750W 240V - DIMMABLE

Manufacturer: Sun System / Sunlight Supply

Lumatek™ Electronic Ballasts

More lumens generated per watt of electricity consumed - Lumatek™ ballasts have increased efficiency over magnetic ballasts. They lose fewer watts from the power supply to the lamp. This is a power factor of 95%+. The high frequency output results in low power loss
Fast start-up - they reach full brightness quickly

Completely silent
Small compact design
Produce less heat
Cut-off circuitry - cut off when a short is detected. For ultimate safety
Fully interchangeable - Lumatek™ ballasts can light both HPS and MH bulbs (excluding the 750W which is HPS only)
NEW - A dimming knob has been added which will allow them to be set at 50/75/100% (only reduce the amount of light not the power usage).

UNIQUE FEATURE!All Lumatek™ ballasts come wired with our standard female lamp cord receptacle that accepts our proprietary, patented male lame cord, making these units compatible with all Sun System® reflectors. Purchase lamp cord with socket assembly separately.

Price: $184.80
