Slotted for excellent ventilation

Accomodates 3/16& tempered UV protected glass (sold separately)

NEW & IMPROVED REFLECTOR MATERIAL

This brand new, unique aluminum, imported from Alanod in Germany, provides beneficial qualities which make it ideal for aquarium use. It is still 95% reflective, like the material we used in the past, but this textured material provides unmatched uniformity and diffusion characteristics. No other material comes close to eliminating hot spots.

This material is not Hammertone. It is also very easy to clean, simply wipe it down with warm water and a mild soap when necessary. We are proud to provide you with this upgrade at no additional cost!

Price: $131.95
