Manufacturer: HydroFarm

Ostberg Ostberg 6" Fan, 487 CFM (ECFCK6C)

In-line centrifugal duct fan with high capacity and excellent reliability. The straight through radial fan is compact and very easy to install. It can cope with high pressure and long duct runs, while still operating at acceptable sound levels. Ostberg fans have casings manufactured from galvanized steel and are moisture resistant. They are approved for installation in humid or damp environments being rated IP44 when installed in a duct system. The fan speed can be controlled by voltage variation regulators. Several fans can be connected to the same controller providing the total rating of the controller is not exceeded. The motors are an external rotor type asynchrony motor. They have maintenance free sealed ball bearings and are protected from over heating by thermo contacts.

European engineered
Low profile housing for ultra quiet operation & easy installation in tight spaces
Guide plates to streamline airflow
Sturdy galvanized steel
Universal mounting bracket included
5 foot grounded preinstalled power cord
Energy Star rated
UL listed
5 years warranty
