Grodan Delta Gro-Blocks

Grodan® Delta blocks are the most uniform block available on the market. They feature improved grooves at the base to promote even better drainage. They are available in a large assortment of sizes and configurations to suit all types of plants. These growing blocks are made for direct sowing or “blocking on” of Macro and Multiblock raised plants. AO 36/40 plugs fit well into the hole size provided by the blocks. The blocks can then be placed on top of a slab to provide for a larger growing volume.
Hugo is the largest of the growing blocks. It provides enough growing volume to support a larger plant, so it does not need to be placed on top of a slab.
