Soil & Hydroponics Grow Media

- Hydroton / HigroMite,

Rockwool / Stonewool, Coconut Coir

(Coco), Potting Soil, Worm Castings

Growcubes - large bag Fills 23- 1 gal pots (2 cubic feet 3 per Case)

Model: eco-5537C

Growcubes - large bag Fills 23- 1 gal pots (2 cubic feet 3 per Case)

Manufacturer: grodan

Growcubes - large bag Fills 23- 1 gal pots (2 cubic feet 3 per Case) (eco-5537C)Grodan Mini Cubes, 2 Cubic Feet bag, case of 3

Grodan Stonewool (rockwool) is made from molten rock spun into cotton candy-like fibers and then compressed into cubes, blocks, or slabs. Where other rockwool brand manufacturers cut all sizes from one batch of wool, Grodan is unique by making different types of fibers. The purpose is to support the requirement of the plant in the different plant stages. Grodan has a tremendous capacity for absorbing nutrient solution while retaining plenty of oxygen for rapid plant growth. Grodan comes in graduated sizes. Seedlings started in cubes are easily transferred to blocks and then onto slabs, if desired. Seedlings or cuttings started in the Grodan cubes can also be transplanted into more traditional planters and growing mediums.

Grodan Mini Cubes -The product consists of small stonewool croutons about the size of a finger nail. When you use this potting mix the miniature cubes stack on top of each other and air pockets are created throughout the pot. Growcubes are difficult to over-water if the container has good drainage. The Growcubes are a light weight alternative to your regular potting mix. You can use the Growcubes in any size pot and in many different growing systems, such as ebb & flow, top watering, or just with a watering can. Good results have been seen even with continuous watering. The Growcubes do not need to be changed as they last for the life of your plant. If you are new to hydroponics, then this is the product you should choose. Complete with package instructions, Growcubes are easy to use and reasonably priced.

Grodan Growcubes

Growcubes are small loose 1/2” cubes of stonewool. The advantages are better aeration, maximum drainage (you can hardly ever over water your plants), easier mixing with other loose media (such as expanded clay rocks), lighter weight and much cleaner than peat-based media. The properties of Growcubes are similar to a 50/50 mix of absorbent to repellent stonewool.

SKU: RW91003
Weight: 21.3 lbs.
Package Dimensions: 23.8L x 20.5W x 24.5H
Suggested Retail: $109.95
