Plant Food, Nutrients, Fertilizers & Supplements - Primary & Secondary, Essential & Minor Elements, Macronutrients, Micronutrients

Strapped - 1/2 Gallon

Model: eco-2831C
Strapped - 1/2 Gallon

Manufacturer: -

Strapped
Strapped - Give your plants a sticky treat with Botanicare's newest carbohydrate addition – Strapped™. Made from unsulfured black strap molasses, Strapped provides soil growers an alternative to the hydroponic additive Sweet during the final weeks of flowering. Large amounts of flower plumping nutrients fill the sticky molasses of Strapped and help to increase your crops harvest yields and essential oil production.
Strapped, 64 oz
Give your plants a sticky treat with Botanicare's newest carbohydrate addition - Strapped. Made from unsulfured black strap molasses, Strapped provides soil growers an alternative to the hydroponic additive Sweet during the final weeks of flowering. Large amounts of flower plumping nutrients fill the sticky molasses of Strapped and help to increase your crops harvest yields and essential oil production.
Unsulfured blackstrap molasses is made by extracting the juice of fully mature sugar cane and then evaporating it down to thick syrup. The minimal refining process allows unsulfured BSM to retain higher levels of potassium, sulfur, magnesium and other micronutrients than more refined grades of molasses such as those made from beet sugars.
BENEFITS TO YOUR PLANTS:• Molasses feeds beneficial microbes in soils and potting mixes. The boosts of energy that they receive help them to convert nutrients such as nitrogen to a more efficient form unlocking the full potential of your fertilizers.
• Plant roots can absorb some of the carbohydrates into their tissues thus carrying other essential minerals into the plant.• Molasses can increase the levels of potassium to the plants which promotes fruiting and flowering.
• Botanicare's unsulfured molasses can also feed endo and ecto-mycorrhizae which increase availability of all plant nutrients for uptake.
