Sun Shield for Blazer 6in

Model: 904483
Sun Shield for Blazer 6in

Manufacturer: Sun System / Sunlight Supply

Sun Shield Reflector CoversSun Shield for Blazer 6in (904483)The reflector heat shield is a sturdy, custom-fitted cover that double-insulates your existing air-cooled hood against the heat your lights generate. This results in a cooler environment, happier plants and energy savings in the form of increased A/C efficiency. IR blocking and heavy duty wool insulating material custom fit to your favorite Sunlight Supply® reflectors Reduce your grow room temperature. Maximizes efficiency of your air-cooling by containing heat. Quiets roaring air inside the reflector. Soft, durable and machine washable. Strong two piece construction consisting of a high quality insulating wool liner and radiant barrier fabric 95% reflective. Professionally made in the USA. Sun Shields are intended to be used only on actively air-cooled reflectors. See "Products Videos" on home page to see Sun Shield in use.
