Manufacturer: Sun System / Sunlight Supply

Sun System® Commercial Greenhouse Metal Halide Fixtures

The Commercial Greenhouse Fixture is designed to withstand damp, hostile conditions found in greenhouse environments providing years of reliable performance.
Specifically engineered extruded aluminum ballast enclosures is designed to dissipate heat. The powder coated finish is attractive, durable and will never rust.
We use only the finest components – including domestic high temperature capacitors.
Built-in hanging brackets make for easy installation.
Compatible with Sunstar reflector – made from 95% reflective German aluminum for excellent output and diffusion.
New Feature: Quad tap ballast leads (120, 208, 240, 277) are all accessible in the junction box. This allows for easy installation without opening the fixture housing.
Our EZ Cap door (patent pending) allows easy access to the capacitor without having to de-install the entire fixture.

FREE computer generated lighting layouts.
The Sunstar reflectors do not accept glass. For the ETL listing to apply metal halide lamps need to be “MP” protected MH lamps.
Purchase ballast, reflector and lamp separately.
These ballasts do not come with a power cord due to the different voltage options. Purchase power cords separately.
Fixtures should be installed by a licensed professional only.

Order separately:

010765 SUNSTAR MIDSIZE REFLECTOR
Price: $59.78
