Triton RO|DI100 100gpd Reverse osmosis water filtration system

Model: 728834

Triton RO|DI100 100gpd Reverse osmosis water filtration system

Manufacturer: Hydro-Logic

Triton RO|DI100 and RO|DI200The Triton line of aquarium specific water filtration systems, designed by Hydro-Logic Purification Systems, are built with one goal in mind: to deliver the highest quality, professional grade products, incorporating earth friendly designs and components. We strive to offer the tools for the serious aquarist needed to maintain the healthiest and most vibrant aquariums possible.

Reverse osmosis membranes remove 99% of contaminants - while final de-ionization state delivers 000 PPM water.

Ensure your aquatic life gets the purest water possible.
Highest quality components, top level engineering, earth friendly design.

Units Include:

1 micron sediment pre-filter
5 micron earth friendly coconut carbon pre-filter

Mixed bed, color changing DI post filter
USA made TFC RO membranes
Powder coated aluminum bracket
Inlet pressure gauge
Membrane flush valve
Quick-Connect fittings

Color coordinated fitting collets and tubing
Automatic shut-off valve

MSRP: $244.95

Price: $225.61
