Quantum 600W Digital Ballast, 120/240V Dimmable

Model: hf-QT600

Quantum 600W Digital Ballast, 120/240V Dimmable

Manufacturer: HydroFarm

Quantum 600W Dimmable Ballast
The Quantum Dimmable Ballast brings quality, efficiency, and high intensity illumination to your garden. With a Power Factor of 99.9%—a highly stable output frequency—the Quantum Dimmable ballast lets you run your lamps at the strength you need allowing you to control your light spread. Rigorously engineered, it features a resin cased circuit board with a sealed bearing fan so it will run cooler than any other ballast and it's been tested to withstand the extreme atmospheric conditions of virtually any growing environment. The Quantum Dimmable Ballast is silent, generator-ready, efficient, and cool-running—this is one cool ballast.

Run at 100%, 75% or 50% power (400W runs at 100% and 75%)
Strikes both metal halide and high pressure sodium bulbs
Accepts 120V/240V with no wiring needed (both cords included); 208V-configurable with electrician assistance
Accepts 50 Hz to 60 Hz with no extra wiring needed
Runs 15% cooler than other digital ballasts on the market
Has a continuous power factor of 99%
The most stable output frequency of any ballast
Higher lumen output than magnetic ballasts
Can run efficiently on generators without flickering
Resin sealed circuit board for high humidity installations
Can easily be used in conjunction with lighting controllers and flip boxes

Price: $106.35
