Plant Food, Nutrients, Fertilizers & Supplements - Primary & Secondary, Essential & Minor Elements, Macronutrients, Micronutrients

SugarDaddy 10 lt

Model: hf-TFSD10L
SugarDaddy 10 lt

Manufacturer: Technaflora

Technaflora SugarDaddy 10 lt (TFSD10L)SugarDaddy is a revolutionary plant nutrition product that supplies essential carbohydrates and all twenty amino acids in a rapidly available form which greatly enhances the fragrance and essential oil production of flowers and fruits during all stages. SugarDaddy ensures continued rapid growth rates throughout the flowering stage as nitrogen levels in your fertilizer formulas are lowered. SugarDaddy is suitable for use in soil, soiless, and hydroponic-based gardening mediums and is fully compatible for use with all Technaflora products or any premium quality soluble fertilizer.
The unique combinations of ingredients in SugarDaddy are vital for all stages of plant growth and development. During the seedling stage, SugarDaddy rapidly accelerates sprout growth and prepares plants for transplanting. During the vegetative stage, SugarDaddy promotes strong plant structure,which is a critical precursor to final yield success.
Of maximum benefit during both transition and reproduction, SugarDaddy fosters healthy stage progression by limiting detrimental transition related stressors. Further, the lower nitrogen levels often found in flowering stage fertilizers are overcome by using SugarDaddy -- as carbohydrate, protein, and fatty acid synthesis is achieved, vigorous growth rates are maintained along with the production of essential oils and the aroma value of flower buds and fruits.
