5 Gal Bio Cartridge Retail Kit

Model: hf-VCBC5RK

5 Gal Bio Cartridge Retail Kit

Manufacturer: Vermicorp Organics

Vermicorp 5 Gal Bio Cartridge Retail Kit (VCBC5RK) Comes with cartridges and bags

The Vermi T Bio-Cartridge holds a plethora of bio diversity that isn't found in any other tea on the market.

The coco woven husk that packages the dry ingredients mimics the root structure of a plant with its fibrous strands. A balanced and unparalleled mixture of thermophilic compost, earthworm castings and Alaskan humus make up the majority of the volume within the cartridge.

The mixture is fortified with fossilized kelp and inoculated with endo and ecto mycorrhizae. Also in the cartridge are six proprietary ingredients included as food sources that are all specific to within one tenth of a gram. The bottle of Awake found in the package with the bio-cartridge is poured into the cartridge and activates the culture of biology. When at least 24 hours have passed the cartridge is ready to brew.

Once placed into the basket of the 5/10 Vermi T Extractor, the bottle of Frenzy is emptied into the reservoir. The Frenzy is the final food source for the organisms. It is unsulfured, dehydrated molasses.

Depending on the size of your cartridge five or ten gallons of de-chlorinated or reverse osmosis water is added and the tea is ready to brew!!

Vermi T Bio-Cartridge Retail Kits are designed for a retail store to have a convenient way to offer freshly extracted microbial rich solution to their customers. These kits come with everything you need to make Vermi T and a correct volume of labeled containers to refrigerate and sell as a shelf able product. These are not typically sold as a kit to an end-user but rather sold as ready to use concentrate in half gallon increments.

Manufacturer's Product Information

MSRP each \$339.99

UPC891155002212

Dimensions 18.2 x 4.5 x 29.5

Case Quantity 1
