5 Gallon Vermi T Bio-Cartridge

Model: hf-VCBC5

5 Gallon Vermi T Bio-Cartridge

Manufacturer: Vermicorp Organics

Vermicorp 5 Gallon Vermi T Bio-Cartridge (VCBC5) Comes with cartridges only

The Vermi T Bio-Cartridge holds a plethora of bio diversity that isn't found in any other tea on the market.

The coco woven husk that packages the dry ingredients mimics the root structure of a plant with its fibrous strands. A balanced and unparalleled mixture of thermophilic compost, earthworm castings and Alaskan humus make up the majority of the volume within the cartridge.

The mixture is fortified with fossilized kelp and inoculated with endo and ecto mycorrhizae. Also in the cartridge are six proprietary ingredients included as food sources that are all specific to within one tenth of a gram. The bottle of Awake found in the package with the bio-cartridge is poured into the cartridge and activates the culture of biology. When at least 24 hours have passed the cartridge is ready to brew.

Once placed into the basket of the 5/10 Vermi T Extractor, the bottle of Frenzy is emptied into the reservoir. The Frenzy is the final food source for the organisms. It is unsulfured, dehydrated molasses.

Depending on the size of your cartridge five or ten gallons of de-chlorinated or reverse osmosis water is added and the tea is ready to brew!!
