## 8 Burner NATURAL GAS CO2 Generator - Low Altitude

Model: dl-200877

8 Burner NATURAL GAS CO2 Generator - Low Altitude

Manufacturer: LTL Controls

8 Burner NATURAL GAS CO2 Generator - Low Altitude (200877) There are 2 distinct types of LTL Controls 8 Burner CO2 Generators available, those for Propane and those for Natural Gas. You can then choose between High Altitude (above 5,000 ft) and Low Altitude (below 5,000 ft) models of each. All generators come with the correct regulator and hose, along with pre-installed, clean-burning brass burners. Both units are equipped with features like a safety tip-over switch, which automatically turns off the unit if it tips over or falls, an electronic ignition with dual redundant solenoid valves, which eliminates the open pilot flame and makes these generators twice as safe as others on the market.
