8 INCH X 10 FOOT SUN SHIELD DUCTING

Manufacturer: Hydro Innovations

Sun Shield™ Ducting Cover Heat Shield

IR blocking and heavy duty wool insulating material custom fit to your favorite Sunlight Supply® reflectors

Reduce your grow room temperature

Maximizes efficiency of your air-cooling by containing heat

Quiets roaring air inside the reflector

soft, durable and machine washable

Strong two piece construction consisting of a high quality insulating wool liner and radiant barrier fabric

95% reflective

Professionally made in the USA

Patent Pending

The reflector heat shield is a sturdy, custom-fitted cover that double-insulates your existing air-cooled hood against the heat your lights generate. With the reflector heat shield, less heat escapes into your room and is instead contained within your hood to be better carried away by your existing air-cooling. This results in a cooler environment, happier plants, and energy savings in the form of increased A/C efficiency.

The flexible Sun Shield® Ducting Heat Shield is a sturdy sleeve that double-insulates your existing air-cooled ducting against the heat. The ducting heat shield allows you to create a cooler environment for healthy plants and energy savings on A/C.
