

pH, EC & TDS Meters & Test Kits for Water & Soil, Timers, Instruments & Calibration Solutions > pH, EC, PPM & TDS Meters, Monitors, Testers, Pens & Test Kits for Water & Soil

Accurate PPM 9

Model: CW514

Accurate PPM 9

Manufacturer: Control Wizard

This continuous PPM monitor is rugged in design and function. The meter displays both PPM and temperature and is unaffected by electromagnetic fields from pumps located in reservoirs. It has a tested back lit LCD display and that is bright enough to easily see but not strong enough to cause problems with flowering plants. It has both, a temperature and PPM electrode for superior accuracy and reliability. A one point calibration screw is located on the front for easy and reliable accuracy and it is powered by a 120 volt ac to dc transformer. The ruggedly accurate PPM electrode is replaceable and its replacement cost is affordable and easily available.
