Active Aqua Grow Flow 2.0 Expansion Kit w/six 5 gal Square Pots

Model: hf-GFOE3

Active Aqua Grow Flow 2.0 Expansion Kit w/six 5 gal Square Pots

Manufacturer: HydroFarm

This expansion kit supports our Grow Flow Ebb and Gro Controller unit. Maximize the performance of that system by adding six more buckets through this pack. These buckets work with all ebb and flow controllers, so you can augment whatever setup you've already got in place or are thinking of adding to your grow room. With multiple kits, your growing knows little bounds! Expand your ebb & flow system up to 48 plant sites on one control unit—depending on reservoir size—control unit and reservoir sold separately.

Includes

6 - Outer buckets
6 - Inner buckets
6 - 3/4" barbed tee connectors
3 - 3/4" barbed elbow
6 - Screen fittings
12 - Rubber washers
1 - 25' roll of 3/4" tubing

Features

Centered drain fitting minimizes standing water

Unique aeration channels for improved root health

Each bucket holds approximately 13 L of clay pebbles or similar medium

*A control unit and reservoir (sold separately) are required to use this expansion pack

Price: \$57.71
