AutoDrain Controller

Model: ADC-1

AutoDrain Controller

Manufacturer: C.A.P. Custom Automated Products

Auto Drain Controller . (ADC-1)ADC-1 The ADC-1, Auto-Drain Controller, allows you to put in a wastewater drain, anyplace that you would like. It consists of a controller bucket with a float switch. When the float switch detects the presence of water, it turns on the pump (not included) to pump out your water to a waste drain of your choice, even higher than the controller. You could have your run-to-waste tables drain into an ADC-1 for automated removal of waste water. It will run most any pump that can fit inside the controller. It has 1/2" inputs and outputs, but can easily be modified to accommodate any size pump. 3 year no hassle warranty.
