Autopilot Commercial 8 Light Controller High Power HID

Model: hf-APCLC8DX

Autopilot Commercial 8 Light Controller High Power HID

Manufacturer: -

Autopilot's eight outlet commercial light controller is designed to safely control today's digital ballasts.

The commercial eight light controller features an integrated delay to "soft start" each bank of 4 lights (5 min delay between banks), reducing the start-up load. External breakers allow the user to easily shut down power to the attached equipment. The commercial light controller is made from steel and built to last.

- Heavy-duty relays
- Durable steel enclosure
- Operate multiple HID or fluorescent light fixtures from a single controller or timer device
- 120V trigger cable and 120V accessory outlet

Price: \$217.59
