Autopilot Digital Environmental Controller

Model: eco-5790
Autopilot Digital Environmental Controller

Manufacturer: HydroFarm

Digital Environmental Controller
The Autopilot Digital Environmental Controller (DEC)
precisely controls temperature and humidity within your
grow area. The DEC coordinates the use of supplemental
CO_2 injection within the temperature function. The DEC
has four outlets and a 15' remote combination probe with
highly accurate temperature, humidity and light sensors.
Easy to use push button functions are identified on a large
digital display. Built in data logger records minimum and
maximum temperature and humidity levels.
Combines temperature, humidity and CO_2 controls together in one
flexible unit with digital precision

 Combines temperature, humidity and CO_2 controls together in one flexible unit with digital precision
 Control your temperature and humidity independently
or synchronized
 Day/night temperature set points
 Remote 15' temperature and humidity sensor
