Azamax - 4 oz.

Manufacturer: Parrys

Azamax -4 oz. (eco-5644L) AzaMax is a highly effective pest control method designed to decimate pest populations. It is made from completely organic active ingredients, specifically one, potent, bio-compound found in Neem oil. AzaMax targets spider mites, thrips, fungus gnats, aphids, whiteflies and many other airborne and soil borne pests. AzaMax is an antifeedant and insect growth regulator and it controls pests through starvation and growth disruption. It also is a good systemic product that plants can easily uptake through roots for efficient control of sucking, mining and leaf eating pests, a rare feature among biological or biochemical pesticides.
