## B'Cuzz Blossom Builder Tabzz, box of 18 Tabzz

Model: hf-BZTABBZ

B'Cuzz Blossom Builder Tabzz, box of 18 Tabzz

Manufacturer: Atami

Atami B'Cuzz Blossom Builder Tabzz (BZTABBZ) B'Cuzz Blossom Builder Tabzz are effervescent tablets developed for the flowering period and can be easily dissolved in the nutrient solution to ensure that the plant spends all its energy on the development of flower bunches. This promotes explosive flower production, which makes the flowers larger, heavier, and more compact, but preserves the characteristic odor and taste of the species.

B'Cuzz Blossom Builder Tabzz are suitable as an addition to the regular NPK nutrition for cultivation on soil, hydro culture, and coconut. For briefly flowering plants, add them to the nutrient solution from the 4th week of the flowering cycle onwards, until the last week of flowering. In the case of long flowering plants, start one week later with the Blossom Builder Tabzz.

Dosage: 1 to 2 B'Cuzz Blossom Builder Tabzz to 100 liters of nutrient solution.

How to Use B'Cuzz Blossom Builder Tabzz For 100 liters of nutrient solution:

Fill your nutrient tank with tap water of about 20 degrees.

Set the EC between 1.2 and 1.6 with your basic nutrient (A and B nutrient or 1-component). Do not add PK 13-14.

Add 1 to 2 B'Cuzz Blossom Builder Tabzz.

Set the pH value to 5.5/5.8. Your EC is between 1.6 and 2.1

Quality guaranteed: B'Cuzz Blossom Builder Tabzz are packed light-tight, to ensure quality.
