B'Cuzz Grow Rokz

B'Cuzz Grow Rokz are a special kiln-fired, lightweight aggregate that is super-heated and formed into pebbles 10-16 mm in size. The ceramic shell and inner pore structure retains moisture and releases it back to your plant's roots as needed. Grow Rokz will not compact, ensuring excellent aeration for the life of your plant. It is reusable and lasts indefinitely; making it a great value. Grow Rokz are excellent for use in net pots, ebb & flo and drip systems. They are available in 45 liter bags.

Price: \$30.25
