BLOOMBASTIC 5.5 LT Florida Label

Model: 732583

BLOOMBASTIC 5.5 LT Florida Label

Manufacturer: Atami

Atami Bloombastic® 5.5 Liter

The Bling Bling for your plants, The Bloombastic formula contains biological minerals in combination with our next generation ATA biological stimulants to create a one of a kind nutrient additive specifically designed for the flowering and ripening of your plants. Bloombastic is engineered to stimulate the enzyme process on several levels that will make your plant less sensitive to stress factors such as: warmth, dry air, high light intensity, disease, and nutrient inadequacies. Bloombastic will elevate the performance of any brand of base nutrient to a master gardeners level. When using Bloombastic in the last 4 to 6 weeks of the flowering and ripening stage you will see explosive flower production, increased sugar content that adds flavor and weight gain as well as large dense compact flowers.

Bloombastic

Bloombastic is a revolutionary nutritional supplement based on optimal levels of bio mineral nutrients in combination with our next generation bio stimulant activators. This product is scientifically formulated to provide a comprehensive array of micro nutrients to ensure that your plants get a well balanced diet and show signs of vitality and vigor.

Atami has identified an ideal PK ratio of 0-20-21 European NPK (for USA is the NPK 0-14-15) for explosive fruit setting and powerful flowering. When you combine this ideal PK ratio with our optimal level of mineral and micro nutrients, it will absolutely upgrade the quality of harvest and increase your yield no matter what base nutrient you are using.

Features & Benefits

Targets the plants energy needed at a cellular level.

Will provide an explosion of sugar and flower production as well as a massive production of resin crystals.

A substantial final weight increase is the net result of the above two points.

This product will also help the enzyme process on several levels and that will help your plants deal with stress factors such as high heat levels, dry air, high light intensity, disease, and nutrient deficiencies.

Using Bloombastic will also ensure a soft sweet flavor and aroma of the bloom.

You can use BLOOMBASTIC on all substrates, as:

(Potting)soil; Coco (compressed and welled up); Rockwool (surfaces and cubes); Mapito; Quantigo.

BLOOMBASTIC can be used in combination with all irrigation systems, as:

Nutrient Film Technique (NFT); Ebb and flow; Droppers; Sprinklers; Aeroponics; Bubblers.

1.12% Chelated Iron

Derived from:

Pottasium Phosphate, Pottasium Hydroxide, Phosforic acid, Iron EDTA, Laminara Digitata, Ascophyllum Nodosum

All natural based nutrient additive

Directions of Use

Directions for use: Bloombastic should be used in the final 4-6 weeks of the bloom and ripening stage of the plant growth. Mix your usual base nutrients (this product can be used with any brand of nutrient). Then add 1/3 to 3/4 tsp of Bloombastic per 1 US gallon of water (0.5 –1ml per 1000ml) in your reservoir. Bloombastic is suitable for all sorts of cultivation substrates (soil, hydro and coco) and all irrigation systems.
