

Bluelab Connect Stick

Model: hf-BLU8002

Bluelab Connect Stick

Manufacturer: Bluelab

Get connected - data log and view nutrient measurements from your crop wirelessly.

The Bluelab Connect Stick receives wireless data from Bluelab Connect Monitors or Controllers, logging the data to the cloud. One Connect Stick will receive data from multiple Bluelab Connect Devices.

Simply place the Connect Stick into a USB port on your computer, download and install the free Connect Software to begin monitoring crop performance wirelessly. View readings from your PC or mobile device so you'll know when to adjust your nutrient solution to the optimal range.

Add other Bluelab Connect Devices to your Connect Software at the click of a button.

Features• Data logging capability (when used with Bluelab Connect products, sold separately)• Free Bluelab Connect Software available online• View data and current status remotely via Google Docs (A computer with permanent internet access is required)• Installation instructions

Price: \$99.00
