

Champ pH Tester

Model: hf-HI98106

Champ pH Tester

Manufacturer: Hanna Instruments

Hanna Instruments Champ pH Tester (HI98106)The Champ revolutionized the pH industry by providing non-technical personnel with a simple, inexpensive solution to accurate pH measurement.

This tester is used by millions of people around the world to monitor pH in laboratories and industrial applications as well as in agriculture, fish farming, food manufacturing and quality control, swimming pools, and the printing industry.

With a renewable cloth junction, the Champ has an extended life over typical pH testers. A normal junction clogs with use over time and a typical tester would normally have to be thrown away once the junction is too contaminated. Instead, this junction is 2 cm long and when dirty, can be pulled out to expose a fresh section to effectively renew the Champ's life.

Calibration is performed manually at 1 point with a trimmer located on the side of the tester.

With a battery life of 800 hours of continuous use, the Champ will provide years of testing before the batteries need to be replaced.

Features

Accuracy (@20C/68F): 0.2 pH

Calibration: Manual 1 point

Temperature compensation: NA

Battery type / life 400 hours

Renewable junction

Easy one point manual calibration

800 hour battery life

Simple to use

Economical

Includes protective cap, calibration screwdriver, batteries, and instructions

Manufacturer's Product Information

MSRP each \$62.95

Dimensions 2.7 x 1.4 x 8.3

Case Quantity 1

Price: \$43.76
