CNS17 Bloom Quart

Model: hf-BCNCNSBQT

CNS17 Bloom Quart

Manufacturer: Botanicare

Botanicare CNS17 Bloom Quart (BCNCNSBQT) CNS17 is ideally suited to wide range of vegetable, flower and fruiting crops grown hydroponically, in the soil or soilless grow substrates. While CNS17 is very effective in all substrates, growers using Coco coir fiber will be particularly impressed. CNS17 is formulated to contain optimum levels of calcium and nitrogen required to offset the high level of potassium that naturally occurs in coco fiber. CNS17 is the result of new production technology allowing us to create a professional strength one part fertilizer containing all the required nutrients in the correct balance. CNS17 combines high levels of calcium with sulfates and phosphates to provide a complete spectrum of plant nutrients. Virtually no other commercial hydroponic single part nutrient offers the spectrum of nutrients that are contained in CNS17. Additionally, when diluted with water, the molecular composition of CNS17 allows the organic structures to hydrolyze providing an energy source for beneficial microbes in solution.
