CO2 Controller w/PPM option, temp & humidity, 2-timer, 10-Amp@120vac

Model: hf-CACO22

CO2 Controller w/PPM option, temp & humidity, 2-timer, 10-Amp@120vac

Manufacturer: HydroFarm

C.A.P. (Custom Automated Products) CO2 Controller w/PPM option, temp & humidity, 2-timer, 10-Amp@120vac (CACO22)The CO2-2 has two timers used to add just the right amount of CO2 without the wasteful "overshoot" that other controllers have. One timer controls the length of time the CO2 is released and the other controls how often CO2 is released.

C.A.P. strongly believes that the only way to design and manufacture controllers is the right way. That means understanding what expectations customers have, and manufacturing controllers that meet or exceed their expectations. It means paying attention to details and not cutting corners. C.A.P. is committed to constantly striving to produce the most innovative products in the industry, using only the finest quality components to ensure many years of trouble-free operation.
