CO2 Generator LP 11,310-18,104 BTU

Model: hf-APCG8LP

CO2 Generator LP 11,310-18,104 BTU

Manufacturer: HydroFarm

Autopilot CO2 Generator LP 11,310-18,104 BTU (APCG8LP) Safest and most reliable CO2 generators on the market.

The easiest way to accelerate plant growth. Carbon dioxide is one of the essential ingredients in green plant growth. The Autopilot CO2 Generator provides the carbon dioxide to meet maximum growing potential, and operates for only pennies a day.

Autopilot CO2 generators feature powder-coated steel enclosures that resist moisture, rust and discoloration - providing years of trouble-free operation.

Our two-stage safety pilot valve does not allow fuel to flow to the burner unless the pilot is lit, and will shut down the fuel supply in the event the unit falls or tips over. The solid state electronic ignition module creates a spark to light the burners. Autopilot CO2 generators are available in both propane and natural gas models.

Features

Dual solenoid valves

Precision manufactured brass burners

Solid state electronic ignition module - no pilot light necessary

Tip over switch shuts off gas source if the unit falls or tips over

Shut down warning with LED error indicator light

Fabricated with all high quality components

Easy to operate

Components

8 pre-mounted brass burners

12' gas hose and pressure regulator

Hanging hardware kit

24V power supply

Specifications

1.5 amps/120 volts

Provides 22 cubic feet per hr of CO2

For spaces larger than 14' x 14'
