## CO2 Replacement Regulator for Hydrofarm CO2 System

Model: hf-COREG

CO2 Replacement Regulator for Hydrofarm CO2 System

Manufacturer: HydroFarm

Active Air CO2 Replacement Regulator for Hydrofarm CO2 System (COREG)CO2 is an odorless, invisible, and non-flammable gas. The average level of CO2 in the atmosphere is about 300 PPM (parts per million). If the level decreases down below 200 PPM in an enclosed growing area, plant growth slows to a halt. Through the years of testing and research, the optimum enrichment level of CO2 for plant growth has been established at 1500 PPM. With CO2 enrichment, under good conditions, plant growth rates and flowering will increase 20-100%. CO2 can be used from seedling right through harvest. This product is a replacement part for the old style HF COSYS, not a complete unit.

Manufacturer's Product Information

MSRP each \$79.95

Dimensions 3.5 x 0.5 x 5

Case Weight 26

Case Quantity 8

**Price: \$53.53**
