Model: hf-BCGSPMCFBALE

Cocogro Coir Fiber Bale 5kg

Manufacturer: Botanicare

Botanicare Cocogro Coir Fiber Bale 5kg (BCGSPMCFBALE)COCOGRO has a very low salt content and is available in 1/2" double-sieved long fibers to reduce dust and give ample space within the mix. COCOGRO has excellent drainage properties and can be used over a longer period of time than coir fiber, which has shorter fibers. With longer fibers and reduced dust, growers will experience an optimal air-to-water ratio, which is vital for strong root development. COCOGRO is unique because it is not chemically treated like other coir fibers on the market. COCOGRO is a superior coir fiber because it is aged a minimum of 18 months and has finished its decomposition stage by the time you purchase it. In addition, COCOGRO is exposed to rain water from at least three monsoon seasons, which naturally washes harmful salts from the final product. Most other coir fibers are only 4 to 5 months old and have excessive potassium and salts, and thus have to be chemically treated, an extra step which can be timely and costly, as well as dangerous for your plants.
