Collapsible Drying System

Manufacturer: C.A.P. Custom Automated Products

DRYING RACK (MSC-009)DRYING RACK

The Rack has four separate compartments each 13½ inches in height, and can hold a minimum of 2-3 lb. of wet material per level. A five gallon bucket fits easily into the zippered opening, making product transfer a breeze. When you are finished drying your crop the drying rack collapses to 1½ inches and can be stored anywhere. Many growers are reporting great results by running their drying racks horizontally, making it easier to dry slowly and evenly, and minimizing damage to product by simply spinning the rack, and not turning it by hand. This item makes a perfect addition to the Rolling Thunder Trimmer.

Don't waste the energy and money you spent on your crop, only to have it fall off of a flimsy line onto the floor. Imagine how much space you will save by drying your crops this way, what once took an entire room, can now easily fit in the corner or a closet.
