

Commercial Truncheon Meter

Model: hf-BLU2100E

Commercial Truncheon Meter

Manufacturer: Bluelab

Bluelab Commercial Truncheon Meter (BLU2100E) Big jobs require a big Truncheon! With a conductivity range right up to 6.0EC (60CF or 4200ppm), it will never leave you short. The Commercial Truncheon® Nutrient Meter has been designed for hydroponic crops that require a higher than normal EC or CF requirement during their growing cycle. It's super tough, fully waterproof, has no on/off buttons to worry about and does not need calibrating. It's great for stirring your nutrient tank too!

It is essential when growing with a hydroponic solution to KNOW what the strength of the solution is before feeding your plants AND while they are growing. This is easy when you use the Commercial Truncheon! To take a reading of your solution - simply place the probe head into the solution for 1-2 minutes to reach the same temperature of your nutrient. Remove from the solution and place back in to take the reading as indicated by the flashing lights. Rinse the probe after use in fresh water and clean once a month to ensure the Commercial Truncheon Nutrient Meter remains accurate.

Main Features • EC (0.4 - 6.0), CF (4 - 60) and ppm scales (TDS and 700 scale) • Fully waterproof • No calibration required • Auto sense on and off • No external switches or adjustable buttons • Battery life minimum 1 year (or shelf life of battery)
