

Diatomaceous Earth Insect Killer 4lb

Model: hf-SF51702

Diatomaceous Earth Insect Killer 4lb

Manufacturer: Safer brand

Safer Diatomaceous Earth Insect Killer 4lb (SF51702) This organic pest control formula is ideal as a bed bug killer or for killing ants, earwigs, cockroaches, silverfish, crickets, fleas, millipedes and centipedes. The efficient nature of this organic pest control product makes it the most economical and convenient solution to the wide array of garden annoyances on the market! This product bears the prestigious OMRI®-listed seal as well as the USDA National Organic Program compliant for use in organic gardening seal, certifying this product is organic.

Diatomaceous Earth (DE) is a dust-like product that contains the crushed fossilized remains of diatoms. The dust is ingested by the bed bug or other crawling insect, or as the insect crosses through the powder, the DE will cut their exoskeleton, causing them to dehydrate and die.

The best part about Diatomaceous Earth is that insects cannot develop a resistance to it since there are no chemicals to which they can build up an immunity. If the area where the Diatomaceous Earth is applied becomes wet, it will need to be reapplied. Diatomaceous Earth is effective as a bed bug killer, flea killer, and crawling insect killer.

But BEWARE.... all Diatomaceous Earth is not the same.

Safer® Brand Ant and Crawling Insect Killer Powder with Diatomaceous Earth is made from a patented formula containing amorphous diatomaceous earth, known as silicon dioxide. This particular type of Diatomaceous Earth is derived from fresh water sources and is NOT the same as Diatomite DE which can be derived from unnatural sources and has been linked to cancer. You can shop confidently, knowing that Safer® Brand Ant & Crawling Insect Killer is OMRI® listed and contains Amorphous Diatomaceous Earth.
