Digital Environmental Controller

Model: hf-APCETHD

Digital Environmental Controller

Manufacturer: HydroFarm

The Autopilot Digital Environmental Controller (DEC) precisely controls temperature and humidity within your grow area. The DEC coordinates the use of supplemental CO2 injection within the temperature function. The DEC has four outlets and a 15' remote combination probe with highly accurate temperature, humidity and light sensors. Easy to use push button functions are identified on a large digital display. Built-in data logger records minimum and maximum temperature and humidity levels.

Combines temperature, humidity and CO2 controls together in one flexible unit with digital precision

Control your temperature and humidity independently or synchronized

Day/night temperature & humidity set points

Remote 15' temperature and humidity sensor

Resists EMI/EFI from electronic ballasts

Reliable and easy to use

NOTE: This controller has a 14.5A maximum load. For higher amperage units, such as A/C units, it is recommended to use a power expander.

NOTE: There is no probe extension available for this unit.

Price: \$146.25
