Model: hf-DG00201

Dip 'n Grow 2 oz

Manufacturer: Dip 'N Grow

Dip 'N Grow Dip 'n Grow 2 oz (DG00201) Dip 'n Grow is one of the most effective rooting hormones available. Propagators at nurseries and universities nationwide have increased their yields with this seed-starting product and found Dip 'n Grow to be more economical and easier to use than other rooting agents.

Dip 'n Grow features a liquid concentrate easily diluted with water to the necessary strength. The tested, proven formula contains two root-inducing auxins (IBA and NAA). Alcohol is used as the solvent for the active ingredients, so Dip 'n Grow is self-sanitizing and cross-contamination problems are eliminated.

Save time, money, and disposal of plastics when you choose Dip 'n Grow -- all desired concentrations are obtained from one bottle. As a liquid concentrate, it allows rooting hormones to be absorbed into the cutting stem more evenly and easily, increasing rooting success over the other powders on the market.
