ECO-HYDRO FISH FERT GALLONS 4/CS

Model: 723805

ECO-HYDRO FISH FERT GALLONS 4/CS

Manufacturer: -

Eco-Nutrients Eco-Hydro Fish Fertilizer

The fish we utilize is all fresh caught, bottom fish from the Pacific Northwest. We grind the fish, and use an enzymatic, low heat process to reduce the ground slurry into a refined liquid fertilizer. We use a trace amount of phosphoric acid for stabilization and screen the product. It is 98% fish and is a hydrolisate which means it can be used as a foliar as well as in the soil. Soil qualities are improved based upon the major increase of microbial action stimulated by Eco-Hydro fish fertilizer.
