End Line Adjustable Dripper

Model: DRP-060S

End Line Adjustable Dripper

Manufacturer: C.A.P. Custom Automated Products

Teco Fittings

The adjustable micro sprinkler comes with a strong "C" frame design. Rotation of the rotor allows simultaneous adjustment of flow rate and radius of throw. The Aquila Jet Spike comes pre-assembled for quick and easy installation, and can be placed as far as needed from the main supply line. The rotation of the rotor allows for simultaneous adjustment of both the flow rate, and radius of throw. The Idra Spike comes pre-assembled for quick and easy installation, and can be placed as far from the main supply line as needed. The rigid riser may be raised or lowered inside the stake to suit the height of the plants being watered. The adjustable 8 stream dripper allows for easy regulation of both the flow rate and diameter of throw with ratchet click action between the cap and the base. Each dripper can also be turned to the off position. The Delta Drip adjustable drip emitter allows you to easily adjust your flow rate, and even shut it completely off. Great for top-feed systems. The adjustable spray jet is perfect for the gardener who loves to be precise. Rotation of the valve rotor allows for simultaneous adjustment of both flow rate, and radius of throw. The 360 degree sprayer comes equipped with 18 holes, and can be easily screwed in to existing systems, or new creations. The Winged Micro Spray Jets are great for building your own aeroponic or cloning systems. These jets deliver a 360° water spray using just pump pressure. They can be screwed into PVC piping or Poly tubing. The standard micro sprinkler comes with a strong "C" frame design that allows for excellent water distribution uniformity.
