Europonic Bloom B, 1 gal

Model: hf-HDEBLBGAL

Europonic Bloom B, 1 gal

Manufacturer: HydroDynamics International

For 30 years growers throughout Europe have used EUROPONIC® Nutrients. Originally created by seed merchants in Holland, its formulation has been continually modified and improved in the light of new information and growing experience.

EUROPONIC® Nutrients are balanced and complete. Unlike the competition, EUROPONIC® contains a profile of essential minerals including Nitrogen, Phosphorus, Potassium, Magnesium, and Calcium, along with essential micronutrients that are needed by all plants for healthy, robust growth.

The combination of Europonic® Bloom Part A and Europonic® Bloom Part B contains a profile of the highest quality minerals including Nitrogen, Phosphorus, Potassium, and Calcium plus other essential elements that all plants require for vigorous and strong growth. Europonic® Bloom is a continuous liquid feed nutrient designed to be used with each irrigation.
