ExHale CO2 ExHale 365-Self Activated CO2 Bag

Model: hf-EX50003

ExHale CO2 ExHale 365-Self Activated CO2 Bag

Manufacturer: -

The ExHale 365 is a self-activated version of the Original CO2 Bag. The 365 will provide a 4x4 foot or 128 cubic foot space with CO2 for 9 months of which 6 months are peak production. With 3 months of shelf life and 9 months of CO2, that makes a year. That's the ExHale 365! The ExHale 365 comes with separation seal that doubles as a hanger after activation.

· Steady supply of CO2 for 6 months guaranteed· Maintenance free· No heat· No electricity· Patent pending genetics· Suitable for Organic Production· Made in the USA

How to Use ExHale

ExHale comes complete, simply follow the instructions and place the ExHale bag in your grow space and leave it alone to do its job.

A continuous shower of CO2 directly onto your plants is the most efficient way to deliver CO2. Placing the ExHale CO2 Bag slightly above the level of your plants will ensure they receive the CO2 they need 24 hours a day for up to 6 months.

ExHale can be used for both vegetative plant growth as well as for fruit and flower production. If you have a ventilation system, place the ExHale bag in close proximity to the fresh air intake. CO2 will be drawn upwards through the canopy.
