Model: hf-EZCL128LP

Ez-Clone 128 Low Pro White (No USPS)

Manufacturer: EZ-Clone

NEW IMPROVED EZ-CLONE LOW PRO 128, NOW AVAILABLE IN WHITE

EZ-CLONE has once again re-invented itself and is proud to announce the introduction of it's newest creation, the LOW PRO 128 CLONING SYSTEM. Every aspect of this Aeroponic Cloning System has been carefully thought out and designed with the utmost passion, to produce the most effective and user friendly cloning system ever seen. The overall height has been reduced by four inches, while increasing the structural integrity of the new proprietary Lid and Reservoir. Now available in white, it is manufactured from durable UV protected HDPE plastic. The Lid has alpha numeric symbols formed directly into the plastic, which allows simple identification of multiple strains of cuttings, and comes with four way finger slots for improved Cloning Collar extraction. The Reservoir has an increased lip height, with an extended flange and drainage gutters, to ensure a leakproof design, and improved interface when opening the system to view cuttings. The Waterpump has an extended baseplate and additional suction cups to prevent any possible tipping. It also includes four different Colored Cloning Collars, and a sample set of new EZ-COCO Cloning Collars. Note: too large for USPS.

Price: \$315.68
