EZ Clone 35 Coco Seed Starts

Model: hf-EZCOCO35SS

EZ Clone 35 Coco Seed Starts

Manufacturer: EZ-Clone

EZ-CLONE is proud to introduce the first eco-friendly, transplantable aeroponic seed starters perfect for the green gardener! This new product allows the grower to turn their cloning system into a seed germinating machine. Comprised of virgin coco fibers and organic latex, these earth friendly alternative aeroponic seed starters are perfect for saving time and money. Not only are these coco seed starters 100% transplantable, but allow for superior root structure and growth. Are you ready to experience the future of aeroponics?

Comprised of virgin coco fibers and organic latex, these earth friendly seed starters are the natural alternative for seed propagation.

- 100% transplantable
- Roots grow within and below the collar
- Fully compostable
