## Ginormous 32 oz.

Model: hf-HNHG405

Ginormous 32 oz.

Manufacturer: Humboldt Nutrients

Humboldt Nutrients Ginormous 32 oz. (HNHG405) GIANT flowers and ENORMOUS fruits are what we all want to harvest consistently throughout our lives. Humboldt Nutrients is here to help you accomplish that goal.

Through extensive research and development, the Humboldt Nutrients teams of agronomists and chemists have created Ginormous (0-18-16), the freshest and finest super-bloom booster available.

Ginormous was specifically formulated to help your favorite plants yield the largest fruits, higher brix levels and better aromas. Ginormous is free of any harmful hormones and is 100% bio-degradable.

Using naturally derived premium ingredients, macro and micro elements and carbohydrates, this unique formula will assist in the highest level of crop performance during their critical blooming stage.

Ginormous is designed to make even the most demanding gardeners ecstatic at harvest time. Yet Ginormous is so easy to use, first-time farmers will yield professional results.

Your vegetables and fruits will be tastier, larger...Ginormous with this additive. With Ginormous, plants get top notch ingredients while the gardener gets piece of mind.

Ginormous is different from the competing synthetic chelated bloom boosters. Synthetic chelates can raise the salt-index in a biochemical system and raise the potential for salt build-up and toxicity.

When used as a foliar spray in the first weeks of flowering, Ginormous effectively flips the switch in your plant, sending it into an intense flowering cycle, initiating multiple flowering sites and preventing fungal diseases from forming on your leaves.

If you want to make a difference in the world, your impact cannot be small, it must be Ginormous...and so must your favorite plants, vegetables, herbs and fruits.

### DIRECTIONS:

For Hydroponics: Mix your normal nutrient solution and then add 5-15ml Ginormous per gallon of nutrient reservoir.

For Soil: Add 5-15ml per gallon of water to your nutrient solution.

Foliar Spray: Add 5-15ml/gallon of water. Spray directly on plants during the evening or when lights are off.

DERIVED FROM: Ammonium sulphate, Monopotassium phosphate, Ferrous sulfate, manganese sulfate and Zinc sulfate.
