Model: hf-GFO7KT

Grow Flow Ebb & Flow 12-site 2 Gal Complete Kit

Manufacturer: HydroFarm

Active Aqua's Grow Flow is the most efficient ebb & flow system on the market. With the Grow Flow's easy-to-program controller unit, you can pretty much "set it and forget it." And since your pumps are only pumping a short time each day, the system is extremely reliable and efficient. Just set the fill and drain cycles, and the controller unit does the rest! As for safety, the Grow Flow is the only unit available with fail-safe overflow protection. If the float valve stops operating, the LED indicator lights up on the control panel and the emergency shut-off valve automatically shuts down the system, preventing any spillage or damage to your growing area. Have bigger plans? With our convenient Grow Flow Expansion Kits you can connect up to 24 growing modules to a single 5-gallon system – and up to 48 modules with the 2-gallon system! You can also build your own system from the ground up by purchasing all the components individually.

Save money in your initial setup! The Grow Flow System has everything you need to get started, right down to the fittings and tubing. 12-site complete system.

Includes:

- 7-gallon digital controller unit with 3-year warranty
- Tubing and fittings
- 55-gallon distribution reservoir with drilled lid and lock
- Two 250 GPH high-flow pumps
- Twelve bucket modules (2 gallon)

Price: \$329.97
