GUARDIAN MY POWDER 1LB 12/CS

Model: 733076

GUARDIAN MY POWDER 1LB 12/CS

Manufacturer: Botanicare

Botanicare® Guardian MY#8482; Powder

Guardian MY#8482; is a unique, proprietary blend of Endo-Mycorrhizal fungi, that builds a natural microbial system in and around plant roots which greatly improves plant growth, vigor and production naturally. Mycorrhizae are beneficial soil fungi that colonize in and around the roots of plants. These colonies form a symbiotic relationship with the plants and increase the root mass by up to 1000 times, therefore, allowing the plant to uptake nutrients and water more efficiently. Mycorrhizae also benefits plants by releasing chemicals that aid in dissolving elements like iron that are harder for plants to absorb. Other benefits of mycorrhizal inoculation include improved soil structure due to the increased rhizobial activity, and increased disease and pathogen resistance which can be associated with the excretion of special antibiotics produced by Mycorrhizae.
